

T32 Hematology Program Trainees 2016

Pre-doctoral trainees:

Mattie Casey, GF11B SNAG domain methylation in megakaryocyte-erythrocyte lineage allocation (Mentor: Mike Engel, MD, PhD)

Jared Wallace, Investigating the Role of miR-155 and the interferon response in the hematopoietic stem cell compartment (Mentor: Ryan O'Connell, PhD)

Megan Okada, Unraveling organelle function in blood-stage malaria parasites (Mentor: Paul Sigala, PhD)

Post-doctoral trainees:

Eric Fredrickson, PhD, Mechanisms of mitochondrial protein quality control and iron sulfur cluster biogenesis (Mentor: Jared Rutter)

Radika Gangaraju, MD, Role of hypoxia sensing pathways and inflammation in disorders of increased erythropoiesis (Mentor: Joe Prchal, MD)
