Developmental and
Cancer Biology
School of Medicine
Portland, Oregon USA

Postdoctoral Positions Available

Postdoctoral positions in the Enns/Zhang Labs in the Department of Cell, Developmental, and Cancer Biology at Oregon Health & Science University, Portland, OR USA.

Our labs focus on identifying the molecular mechanisms by which the body senses iron and the pathways involved in maintaining iron homeostasis. Diseases that disrupt these homeostatic mechanisms include, but are not limited to hereditary hemochromatosis, infectious diseases, heart failure, cancer and hematopoietic disorders. We combine state-of-the-art approaches involving mouse models, gene therapy, mass spectrometry, advanced light microscopy and bioinformatics in a collaborative environment.

Successful candidates must have a PhD and/or MD and a published record of accomplishment. Expertise in molecular biology, cell biology, and/or protein chemistry are preferred.

OHSU offers a variety of grant writing and career mentoring programs for postdoctoral fellows.

Please submit a cover letter, curriculum vitae, and contact information for three references to:

Dr. Caroline Enns (ennsca@ohsu.edu)

Salary and benefits: The salary is set according to NIH guidelines. Benefits include health and dental insurance.
