

**Postdoctoral Position at Yale University**  
Yale Stem Cell Center  
Yale Center of Excellence in Hematology

Postdoctoral position is available in the Krause laboratory at Yale ([krauselab.net](http://krauselab.net)). Our lab focuses on how hematopoietic stem and progenitor cells function to maintain hematopoiesis in health, and the molecular mechanisms that dysregulate these cells in leukemia and other disease states. We use in vitro and in vivo cell and molecular approaches to reveal mechanisms of cell fate determination and transformation. The Krauselab specifically and Yale in general is a highly collaborative environment. We are looking for a candidate who enjoys both working independently and also as part of a team.

Eligibility: US citizen or Green Card holder.

Qualifications: PhD, MD, or both with a strong track record of training and independent research in Cell and Molecular Biology, Genetics or related transdisciplinary fields. Experience in cell culture and molecular biology as well as excellent communication and interpersonal skills are required.

Candidates should have a strong publication track record with first author publications in English journals.

Interested candidates should send a CV with names of references to [diane.krause@yale.edu](mailto:diane.krause@yale.edu).

Please visit our lab website at [krauselab.net](http://krauselab.net) for more information about our ongoing projects and recent publications. We look forward to welcoming an enthusiastic and dedicated postdoctoral fellow to contribute to our exciting research endeavors at Yale University.

*Yale University is an Affirmative Action/Equal Opportunity Employer and welcomes applications from women, members of minority groups, persons with disabilities and protected veterans.*
